STEARNS SUPREMACY.

WHY THE STEARNS?

Our experience with foreign cars, covering years of careful study, made us exceedingly reluctant to look to an American manufacturer for a product comparing favorably with the best of the world. Our faith in the American automobile builder with a record for rapid progress towards perfection, led us to make an exhaustive search. The decision to apply to the Stearns automobile the name of "Best of America" was the result of a long and careful investigation. Our investigations also led us to take on the Franklin as the Best Light Car of the world. The engineers connected with our firm spent months at the factory in Cleveland and in the performance of the various tests. Here was a firm which had spent 11 years in progressive work, gradually developing of any other American manufacturer. We unqualifiedly recommended the Stearns in every point which goes to make a perfect car. Call on us for an actual demonstration of what the Stearns will do. Let us show you at your command a car of reserve power for rough road and hill work. The best of Europe and America has been not be had at any price.
